			<p>Builds on what the children learnt in year 1/2 about colour in cycle A. Children finish by creating cardboard sculptures from organic shapes, using Calder’s sculptures as inspiration. In doing so they recall what they learnt about sculpture in year 1/2 cycle A (summer B).</p>	<p>This unit builds on the previous unit, studying colour and shape together for three lessons, looking in detail at the late work of Matisse. More in depth study of the Arnolfini Portrait shows the children how a work of art can tell us things about the past, how a portrait can communicate things about</p>	<p>This unit builds on the drawing skills learnt in year 1/2, cycle A.</p>	<p>This unit gives children the opportunity to continue their exploration of how to apply paint in different ways, using sponges and large, bold brushstrokes to create a stormy sea and sky, building on skills introduced in the units on Colour and Style in year 1/2 cycle A.</p>	<p>This unit builds on the children’s knowledge from their study of paintings showing St George and the Dragon in year 1/2 in the unit on Narrative Art in cycle A.</p>	<p>Children study famous examples of frescoes (exploring what this term means), including Michelangelo’s paintings in the Sistine Chapel and Leonardo’s The Last Supper, previously looked at in relation to symmetry in the unit on Landscapes and Symmetry.</p>

			the people in it, and how a painter can show things about themselves in a work of art. This revisits ideas first raised in the unit on Paintings of Children in year 1/2 cycle A and looks forward to the next unit where portraits are studied in detail

		Why this, why now?					
		This unit introduces the children to how artists use light. It starts by connecting the concept of light to the concept of form, previously studied in Autumn B of year 3/4 cycle A, exploring how form is shown by how light falls on an object. Children practise the skills learnt in year 3 to create still life drawings using graphite, chalk and charcoal to show tone. They continue to develop their colour-mixing techniques introduced in much of the work already carried out in year 1, 2 and 3.	The concept of how space is used in art is directly related to how artists use light and as such, the first lesson in this series refers back to, and deepens the knowledge gathered from the previous unit. By practising shading using graphite, first explored in the year 3/4 unit on Still Life and Form in cycle A, the children draw 3D objects, using varying tones to create the illusion of three dimensions.	Children learn that we now analyse art by identifying that design (or composition) in art means how the different elements of art (line, colour, shape, form, tone, space and texture) work together to make a piece of art. They are made aware that they have studied all of these elements separately over the course of years 1-4.	This unit in Spring B, dovetails with the history curriculum, where the Romans are studied for the whole of the term.	This unit, looking at monuments of the Byzantine empire, also known as the Eastern Roman Empire, is a continuation of the work carried out in Spring B.	This unit builds on the year 1/2 tapestry unit.

	Why this, why now?					
<p>This unit looks at work created by Leonardo - at his anatomical drawings and his painting technique used in the Mona Lisa and The Last Supper (already studied in 'Landscapes and Symmetry' and 'Murals and Tapestries' in year 2). They contrast the work of Leonardo with the paintings on the ceiling of the Sistine Chapel by Michelangelo. This is a more in-depth study of these works which they first encountered in the year 1/2 unit on 'Murals and Tapestries' in cycle B.</p>	<p>This unit builds on the children's knowledge of the renaissance from work in the last unit. They study works of renaissance sculpture by Ghiberti and Donatello. Through these works they explore the concept of relief sculpture, already studied by looking at the Parthenon Marbles in the unit on Architecture in year 3/4, cycle A.</p>	<p>This unit builds on the children's knowledge of the Victorians studied in history in year 5/6 cycle A and their study of architecture in year 1/2. It can prove a useful comparison to see the progress they have made in their drawing skills throughout their years in key stage 1 and 2.</p>	<p>This unit is a continuation of the previous unit, looking in detail at the work of the Victorian designer William Morris. They learn how the wallpaper was produced by block printing and create their own Morris inspired designs printed using the reduction method (essentially the opposite of block printing) on polystyrene tiles. This is an extension of the relief printing skills they learnt in years 1/2 and 3/4.</p>	<p>The impressionists were a group of painters in France who exhibited pictures together in the 1870s and 1880s. Their work is crucial in understanding modernism in painting, explored in the next unit.</p>	<p>This final unit should be seen as a continuation of the children's work on the impressionists and post-impressionists. The late work of Monet and brushwork of Cezanne are considered to be forerunners of abstraction and modernism. The children start by reviewing their understanding of modernism, introduced in the unit on Style at the beginning of year 5/6 cycle A.</p>
